INVITATION TO BID BID NO. 06.1730.01-LED

Peak Drive Storm Drain, Jones Boulevard to Michael Way

This project includes reinforced concrete pipe (RCP) and reinforced concrete box (RCB). The storm drain in Jones Boulevard includes RCP that varies from 36-inch diameter to 66-inch diameter for a total length of approximately 1,240 feet. The storm drain in Peak Drive includes various RCBs, including 9-foot by 6-foot, 10-foot by 6-foot, and 10-foot by 5-foot, for a total length of approximately 2,700 feet.

The project also includes several drop inlets, associated pipe laterals, two access grates and a junction structure. Significant work is required to return the surfaces to a usable condition including paving, grading, sidewalk repair, and fencing and gates. Several utilities shall be relocated, including such items as a 24-inch water line, an 8-inch waterline and coordination for the relocation of a 4-inch gas line, 4-inch electrical conduit and wire, telecommunications, and cable television.

There are significant traffic requirements for Jones Boulevard that will restrict lane closures, limit work hours, limit total construction time, and require some weekend work. All parts of the work are in residential neighborhoods that will require maintaining property access and limiting work hours.

The estimated monetary range of the project is: **\$4,000,000 to \$4,500,000.**
